

Shucare Malaysia Sdn Bhd.

Safety Data Sheet

NON-Hazardous Substance, NON-Dangerous Goods

1. MATERIAL AND SUPPLY COMPANY IDENTIFICATION

Product name: DUBBIN / LEATHER KEEP
Recommended use: Shoe and leather care product
Manufacturer: Shucare Malaysia Sdn Bhd
Street Address: No. 59, Jalan S2 C2,
Green Technology Park,
Seremban 2, 70300 Seremban,
Negeri Sembilan, Malaysia.
Telephone: +606-6017529
Facsimile: +606-6017528

Importer: Shucare Australia
Street Address: 52 Kolora Road, Heidelberg West VIC 3081
Phone: (03) 9458 4949

Emergency telephone number: 131126

2. HAZARDS IDENTIFICATION

2.1 Classification of the substance or mixture

Not Classified as Dangerous Goods.

Not Classified as Hazard product.

2.2 Label elements

Symbol (s) No symbol
Signal Words No signal word
Hazard Statements Not Classified
Precautionary statements (General) : P102: Keep out of the reach of children.

2.3 Other hazards

Not established

3. COMPOSITION INFORMATION

CHEMICAL	ENTITY CAS NO.	PROPOTION
Paraffinic oil	64742-54-7	>50%
Tallow	-	30 – 60%
Non Hazardous ingredients	-	<u>≥30%</u> 100%

4.FIRST AID MEASURES

General Information

Seek medical assistant if discomfort continues.

Inhalation:

Remove victim to fresh air. Remove contaminated clothing and loosen remaining clothing. Allow patient to assume most comfortable position, keep warm. Keep at rest until fully recovered. Seek medical advice if effects persist.

Skin contact:

Wash contaminated skin with plenty of water and soap. Remove contaminated clothing before reused. Seek medical attention in event of irritation.

Eye contact:

Rinsed immediately with plenty of water. In all cases of eyes contamination it is a sensible precaution to seek medical advice.

Ingestion:

Rinse mouth with water. If swallowed, do NOT induce vomiting. Give a glass of water to drink. Never give anything by the mouth to an unconscious patient. If vomiting occurs give further water. Get to a doctor or hospital quickly.

Symptom

Until now no symptoms known so far.

Notes to physician:

Treat symptomatically.

5. FIREFIGHTING MEASURES

Specific hazards: Non-combustible paste.

Auto ignition Temperature:	Not available	
Flash Point:	>170°C	
Explosion Limits	Lower	Upper
	0.6	7.0

Suitable extinguishing media: If material is involved in a fire use water fog (or if unavailable fine water spray) , foam, dry agent (carbon dioxide, dry chemical powder).

Speical risks: Fire can cause thick, black smoke. As a result of thermal decomposition, dangerous products can form: carbon monoxide, carbon dioxide. Exposure to combustion or decomposition products can be harmful to your health.

Advice for firefighters: Can melt and flow in a fire. Fire fighters to wear self-contained breathing apparatus and suitable protective clothing if risk of exposure to vapour or products of combustion.

6. ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

For non-emergency personnel

Exclude sources of ignition and ventilate the area. Avoid breathing vapour or mist. Refer to protective measures listed in sections 7 and 8.

For emergency responders

If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in “For non-emergency personnel”.

Environmental precautions

Prevent the contamination of drains, surface or subterranean waters, and the ground. In case of large spills or if the product contaminates lakes, rivers, or sewers, inform the responsible authorities according to local legislation.

6.3 Methods and materials for containment and cleaning up

Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Preferably clean with a detergent. Avoid using solvents.

6.4 Reference to other sections See Section 1 for emergency contact information.

7.HANDLING AND STORAGE

Handling:

The fumes are heavier than air and can spread across the ground. They can form explosive mixtures with air. Prevent the creation of flammable or explosive fume concentrations in the air; prevent fume concentrations above work exposure limits. The preparation must only be used in areas where all unprotected flames and other ignition points have been eliminated. Electrical equipment has to be protected according to applicable standards. The preparation can be electrostatically charged: always use earth grounds when transferring the product. Operators must use anti-static footwear and clothing, and floors must be conductors.

Keep the container tightly closed and isolated from heat sources, sparks, and fire. Do not use tools that can cause sparks.

Prevent the preparation from contacting the skin or eyes. Avoid the inhalation of fumes and mists that form when spraying.

For personal protection, see section 8. Never use pressure to empty the containers. They are not pressure-resistant containers.

In the application area, smoking, eating, and drinking must be prohibited.

Follow legislation on occupational health and safety.

Keep the product in containers made of a material identical to the original.

Storage:

Store according to local legislation. Observe indications on the label. Store the containers between 5 and 35°C, in a dry and well-ventilated place, far from sources of heat and direct solar light. Keep far away from ignition points. Keep away from oxidising agents and from highly acidic or alkaline materials. Do not smoke. Prevent the entry of non-authorised persons. Once the containers are open, they must be carefully closed and placed vertically to prevent spills.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Measures of a technical nature

Provide adequate ventilation, which can be achieved by using good local exhaust-ventilation and a good general exhaust system. If this were not enough to keep the particulate and fume concentrations of the solvent below the work exposure limit, suitable breathing equipment must be used.

Breathing protection

When workers are subjected to concentrations above the exposure limit, they must use suitable and officially approved equipment. Use active carbon masks.

Hand protection

For prolonged or repeated contact, use polyvinyl alcohol or nitrile rubber types of gloves. Protective creams can help to protect exposed areas of the skin. These creams must NEVER be applied once exposure has occurred.

Eye protection

Use protective goggles especially designed to protect against liquid splatters. Install emergency eyesashes near the use area.

Skin protection

Personnel must wear anti-static clothing made of natural fibre or synthetic fibres resistant to high temperatures. All body parts that have been in contact with the preparation must be washed.

9. PHYSICAL AND CHEMICAL PROPERTIES

Form / Colour / Odour:	Coloured solid.
Solubility:	Miscible in water.
Specific Gravity (20 °C):	0.83 – 0.85g/cm ³
Relative Vapour Density (air=1):	N Av
Vapour Pressure (20 °C):	N Av
Flash Point (°C):	N Av
Flammability Limits (%):	N Av
Autoignition Temperature (°C):	N Av
Melting Point/Range (°C):	45-60°C
Boiling Point/Range (°C):	>300°C
pH:	N App

(Typical values only - consult specification sheet)

N Av = Not available

N App = Not applicable

10. STABILITY AND REACTIVITY

10.1 Reactivity:	No specific test data related to reactivity available for this product or its ingredients.
10.2 Chemical stability:	Stable under recommended storage and handling conditions (see Section 7).
10.3 Possibility of hazardous reactions:	Under normal conditions of storage and use, hazardous reactions will not occur.
10.4 Conditions to avoid:	When exposed to high temperatures may produce hazardous decomposition products.
10.5 Incompatible materials:	Keep away from the following materials to prevent strong exothermic reactions: oxidising agents, strong alkalis, strong acids.
10.6 Hazardous decomposition products:	Under normal conditions of storage and use, hazardous decomposition products should not be produced. If involved in a fire, toxic gases including CO, CO ₂ and smoke can be generated.

11. TOXICOLOGICAL INFORMATION

11.1 Information on toxicological effects

There are no data available on the mixture itself. See Sections 2 and 3 for details.

Inhalation: Material may be irritant to mucous membranes and respiratory tract.

Skin contact: Contact with skin may result in irritation. Will have degreasing action on the skin. Repeated or prolonged skin contact may lead to irritant contact dermatitis.

Eye contact: May be an eye irritant.

Ingestion: Swallowing can result in nausea, vomiting and irritation of the gastrointestinal tract.

Long Term Effects: No information available for product.

Acute Toxicity: No information available for product.

12. ECOLOGICAL INFORMATION

Avoid contaminating waterways. Prevent penetration into the ground. Prevent the emission of solvents into the atmosphere.

Ecotoxicity: No data available on the mixture itself. Do not allow enter drains or watercourses.

Persistence and degradability: No information available.

Mobility in soil: No information available.

13. DISPOSAL CONSIDERATIONS

Refer to State/Territory Land Waste Management Authority. Dumping into sewers or waterways is prohibited. Waste and empty containers must be handled and eliminated according to current, local/national legislation.

14. TRANSPORT INFORMATION

ROAD AND RAIL TRANSPORT

Not classified as Dangerous Goods by the criteria of the Poison Act for transport by Road and Rail.

MARINE TRANSPORT

Not classified as Dangerous Goods by the criteria of the International Maritime Dangerous Goods Code (IMDG Code) for transport by sea.

AIR TRANSPORT

Not classified as Dangerous Goods by the criteria of the International Air Transport Association (IATA) Dangerous Goods Regulations for transport by air.

15. REGULATORY INFORMATION

Poisons Act (Mal): Not applicable

16. OTHER INFORMATION

Date of issue : 28th July 2016

Notice to reader

The information in this SDS is based on the present state of our knowledge and on current laws. The product is not to be used for purposes other than those specified under section 1

without first obtaining written handling instructions. It is always the responsibility of the user to take all necessary steps to fulfil the demands set out in the local rules and legislation. The information in this SDS is meant to be a description of the safety requirements for our product. It is not to be considered a guarantee of the product's properties.
